Sultanate's e-government initiative receives boost through latest Singaporean technology

SQL View expands its offering in Oman through agreement with eDOC Data

Muscat, Oman - May 2015 – SQL View, Singapore based leading enterprise software solution provider, has signed a Memorandum of Understanding (MOU) with eDOC Data to provide cutting edge IT solutions into the Omani market. The two organisations will work closely to develop an e-government records management solution to provide expertise and assistance to state and local government agencies in managing records and information. The solution will help to accelerate decision-making and to ensure accountability and regulatory compliance.

The MOU, signed by Alvin Low, Senior Vice President at SQL View, and Mustafa Abdullah Al Mahrooqi Managing Director at eDOC Data, outlines the basis for ongoing collaboration and alignment between the two organisations. One of the key elements of the agreement is to launch and localise SQL View's KRIS e-Records Management Solution to cater the requirements of the Omani market. This is the first time the solution will be available in Arabic, and Oman will be the first market to deploy this solution in the Middle East.

Commenting on the agreement, Alvin Low, Senior Vice President at SQL View, said: "Oman is at the cusp of transforming its e-government offering and we're pleased to partner with eDoc Data to support this growth. eDOC Data is one of our key partners in Oman and we are looking forward to together supporting Oman's e-government and smart nation initiative through solutions tailored for the Omani market."

SQL View specializes in providing tech products that serve the needs of different sectors including real estate, healthcare and government, amongst others. One of its key solutions is KRIS e-Records management solution that is designed to ensure important government records are captured, managed and retained, while maintaining integrity and longevity. Today, KRIS is widely adopted by over 15,000 users across many government organizations around the world.

About SQL View

SQL View is the leading company enterprise software solution company providing infocomm technology solutions in records management and facilities management.

As a pioneer in ERM solution, SQL View collaborated with Singapore Government in several research and development initiatives, including NAS (National Archives of Singapore), A*Star (Agency for Science, Technology and Research), IDA Singapore (Infocomm Development Authority of Singapore) and URA (Urban Redevelopment Authority), etc. And in 2009, SQL View acquired BUILDFOLIO and integrated it into the operations; and now it has successfully grown into a leading FM solution widely adopted by the big boys in the property scene.

Today, SQL View is the leading ERM provider for Singapore Government, and rapidly expanding to international markets; as well as the Singapore market leader providing FM solution to iconic landmarks such as Marina Bay Financial Center, Raffles Links, Orchard Central, Centerpoint and many more.
